-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30 day MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claims 1-18 are pending.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to zeolite catalyst, classified in class 502, subclass 64.
- II. Claims 7-12, drawn to a process of making epoxide, classified in class 549, subclass 531.
- III. Claims 7,12-14, drawn to a process of making aromatic alcohol, classified in class 568, subclass 716.
- IV. Claims 7, 12, and 15, drawn to a process of making lactone, classified in class 549, subclass 263.
- V. Claims 7,12 and 16, drawn to a process of making oxime, classified in class 564, subclass 253.
- VI. Claims 7,12 and 17, drawn to a process of making alcohol, classified in class 568, subclass 700.
- VII. Claims 7,12 and 18, drawn to a process of making sulfone, classified in class 568, subclass 28.

The inventions are distinct, each from the other because: The catalyst of Group I and the processes of Groups II to VII are drawn to different classifications based on their recognized divergent subject matter. The current processes of Groups II to VII can be made by using other oxidant such as organic hydroperoxide or oxygen with noble metal. The inventions of Groups II to VII are distinct one from another because the starting material and the final product of each

group are distinct one from the another. A reference of one group would not suggest and/or render the other group obvious. A search of one group is not required for the search of the other group. Thus, the restriction requirement as indicated is deemed proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

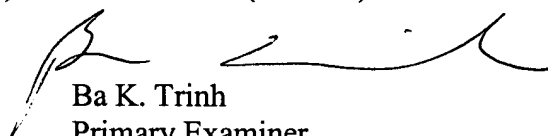

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ba K. Trinh whose telephone number is (571) 272-0695. The examiner can normally be reached on M-F (8:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang can be reached on (571) 272-0562. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
